

Module 5 Wrap-Up Activity

Information Detective Challenge

Course: BSIT

Introduction to Computing / IT Fundamentals

Module 5 - Information Literacy: Searching, Accessing, and Evaluating Information Student

Name: Virna Elaiza M. Labsan

Section: South9

Date: August 16, 2026

Chosen Topic: Social Media and Mental Health

Part 1 – Smart Searching

Your Search Query: Impact of social media on mental health among students

Part 2 – Source Selection

Website Title: Social Media and Mental Health / American Psychological Association

Website URL: <https://www.apa.org/topics/social-media/mental-health>

Part 3 – Apply the CABC Test

C – Credibility

Who wrote or published the information?

Published by the American Psychological Association (APA), a well-known, reputable professional organization of psychologists in the United States. The content is reviewed and written by qualified mental health professionals and researchers.

A – Accuracy

What evidence, facts, statistics, references, or supporting information are provided?

The page cites research studies, includes statistics from peer-reviewed surveys, references published academic research, and links to related articles and reports with proper citations.

B – Bias

Is the website trying to persuade, promote, advertise, or sell something? Explain your answer.

No. The website is an educational and informational resource. It does not sell products, services, or promote any specific agenda. Its purpose is to provide evidence-based information to the public, students, and professionals, not to persuade or advertise.

C – Currency

When was the information published or last updated?

Last reviewed and updated in 2024. The information is current and reflects the latest available research.

Part 4 – Source Type

Selected Source Type: Professional Source

Explain why you selected this source type:

It is published by a professional organization (American Psychological Association) composed of experts in the field. It is not a scholarly research paper (no original study data/experiment), but it is written and reviewed by professionals, making it a Professional Source.

Part 5 – Final Decision

Would you use this source for a school assignment?

Yes

Justify your answer using the CABC Test:

- **Credibility:** Published by the American Psychological Association — a trusted, recognized authority in psychology and mental health.
- **Accuracy:** Supported by research, statistics, and citations from credible studies.
- **Bias:** Neutral and educational — no commercial or persuasive intent.
- **Currency:** Updated in 2024 — recent enough for this topic.

Reflection Question

What is the most important thing you learned about searching for and evaluating online information?

I learned that finding information is easy, but finding reliable information requires careful checking. The CABC Test helps me look beyond what just sounds right — I now know to always verify who wrote it, what evidence they have, if they're biased, and how recent it is. Not everything online is true, and being information literate means taking responsibility for what sources I use.
